Portrayal Count
The number of episodes in which a given humanoid was portrayed. The Romulans, for example, were portrayed in a total of 57 episodes (appeared = 26, mentioned = 29, depicted = 1, and by proxy = 1).

Significance Score
The significance to the story plot of each humanoid portrayed in a given episode is assigned a value between 0 and 1. This column is the sum of all the scores.

Relative Alignment
Humanoid alignment relative to the Federation is recorded as one of the following: **Federation member**, **Federation foe**, **Federation friend**, or **unaligned**.

Absolute Alignment
A categorization of the ethical (Law/Chaos axis) and moral (Good/Evil axis) perspective of humanoid civilizations with selected examples below.

Personality Trait Bipolar Adjective Scales
Personality traits characteristic of each humanoid species are rated on the following five-point bipolar adjective scales.
